DETAILED ACTION

Allowable Subject Matter

1. Claims 1-33 are allowed.
2. The following is an examiner's statement of reasons for allowance: The claimed method provided in claim 1 that includes the combination of measuring track squeeze, providing a microjog distance, calculating a microjog correction value and applying the correction value to the microjog distance as set forth is neither taught by nor an obvious variation of the art of record. Claims 2-11 depend on claim 1. The claimed system provided in claim 12 that includes a controller that microjogs a head by determining a microjog distance, calculates a microjog correction value based on track squeeze and applies the correction value to the microjog distance as set forth is neither taught by nor an obvious variation of the art of record. Claims 13-23 depend on claim 12. The drive as provided in claim 24 that includes a controller that microjogs a head by determining a microjog distance, calculates a microjog correction value based on track squeeze and applies the correction value to the microjog distance as set forth is neither taught by nor an obvious variation of the art of record. Claims 25-33 depend on claim 24.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Drawings

3. The drawings filed 2/11/04 are acceptable to the examiner.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Bi et al. teaches a method and apparatus that corrects track pitch. Allen, filed 8/29/05 corrects for microjog error due to repeatable runout. Szita teaches an arrangement that eliminates track squeeze error.
